Ali Shehroz

Lead Unity Developer | Gaming Products, Monetization & Growth

Islamabad, Pakistan · 0330 5981864 · alishehroz@hotmail.com · linkedin.com/in/alishehroz · alishehroz04.github.io

SUMMARY

Lead Unity developer who takes games from first idea to live release and grows them after launch. Has developed games with 600M+ combined Google Play downloads, including six titles with 100M+ each. Builds gaming platforms with tournaments, rewards from partner brands and ad-funded monetization, and runs user acquisition campaigns for publishers. Leads teams of 10+ developers on company and client projects.

SKILLS

- **Monetization & growth:** ad-funded and reward-based models, in-game economies, retention loops; user acquisition (UA) campaigns on Google Ads, Meta and Unity Ads; optimizing cost per install (CPI) and return on ad spend (ROAS)
- **Product lifecycle:** research, design documents, player journey, art direction, development, testing, monetization, analytics, store release
- **Analytics:** Firebase Analytics, GameAnalytics, Google Analytics, Unity Analytics
- **Publishing:** Google Play Console, Apple App Store, Samsung Galaxy Store, web
- **Technical:** Unity (2D & 3D), C#, React; Photon multiplayer (PUN, Fusion), PlayFab, Firebase; REST APIs; VR; blockchain and Web3

EXPERIENCE

Lead Unity Developer — Ideofuzion, Islamabad — Dec 2023 – Present

- Took Emberbound: Dragon Island RPG (3D, Unity, Android) from zero to live on Google Play: set the whole art style, designed the game systems and did the development, while leading the team through planning and execution.
- Serve as project lead on client projects, heading teams of 10+ developers.
- Led the Ideofuzion team that co-built GameBull (g-b.store) with a client, a branded gaming platform where brands offer their own free browser games, and players watch ads to earn lives, play score tournaments and win the brand's gifts and coupons.
- Handled the platform's game side and backend, ported 30+ Unity and React games to it, and built an in-store QR Score Challenge (scan a shop's poster, beat the target score, win its prize) that is live in production.
- Came up with and presented an original blockchain game concept, where players earn crypto rewards, at the TRON blockchain game development competition; the team won 3rd place.
- Developed play-to-earn games with cryptocurrency and NFT systems, integrating REST APIs for crypto wallets, leaderboards and player data.

Founder & Game Developer — VeganBeef (own Google Play publisher) — Sep 2022 – Present

- Own new mobile titles end to end: research, design documents, player journey, art direction, development, testing, monetization, analytics and store release.
- Publish them on Google Play under the VeganBeef account, including Rocket Kingdoms: Castle Siege, Gemlings: Block Puzzle and Boom Tower Smash.

Game Developer · Team Lead · Marketing & Business Analyst — The Knights Pvt Ltd, Islamabad — Dec 2019 – Nov 2023

- Developed and published racing, driving and simulation games, including six titles with 100M+ downloads each (among them Real Highway Car Racing, Modern Bus Simulator and Modern Car Parking) and Moto Bike Racing (50M+ downloads).
- Led game development teams on the company's titles.
- Ran UA campaigns for the company's published titles, optimizing CPI and ROAS.
- As marketing and business analyst, reported performance to stakeholders using Firebase Analytics, GameAnalytics and Google Analytics, and found optimization opportunities.
- Built retention features (leaderboards, player profiles, PlayFab cloud saves) and retention-focused UI/UX.

Unity Game / Simulation Developer — Automotive Artificial Intelligence (AAI) GmbH, Islamabad — Jan 2018 – Dec 2019

- Built a full-body VR simulation in Unity with the Virtuix Omni omnidirectional treadmill, with computer-controlled characters that learn to react to the user (built with Unity ML-Agents).
- Worked with hardware and software teams on VR input, tracking and integration.

Freelance User Acquisition (UA) Consultant — Remote — 2015 – 2019

- Ran UA campaigns for publishers on Google Ads, Meta and Unity Ads, optimizing CPI and ROAS.

Game Developer — Ninesol Technologies, Islamabad — Jul 2016 – Dec 2018

- Built educational games for children, including letter-tracing tools and storytelling features, working with educators on early-learning goals.

Unity Developer — Jolta Tech, Islamabad — Jul 2015 – Jul 2016

- Built and published mobile games with monetization, progression systems and reward loops.
